Introduction

eMAM™ is a powerful media asset management platform that provides an online proxy library of digital content with rich collaboration tools while managing native resolution content in storage and archive with access from any web browser, Android tablet, or iPad/iPhone. eMAM now supports upload and share of media from iOS devices like iPad and iPhone to any eMAM system. eMAM 5.0 introduces **eFeeder** as a new upload app for iPad and iPhone which lets you easily upload and share your photos, docs, and videos from anywhere in the world to the eMAM system. eFeeder is a desktop upload app that works quite similar to Dropbox, Google Drive, One Drive etc and is easy to install, navigate and user friendly. eFeeder upload app is now available in the App store for iOS devices like iPad and iPhone. Just select the files for upload from your iPhone or iPad, choose the ingest profile and the asset metadata details and upload. eMAM users will also have the flexibility to share the contents using eFeeder app which will be listed with other apps for share options.
